LIBRARY

- 25X1C 1. During 1949 the production output of the sugar, spirits, and yeast industries was low because of a shortage of sugar beets. Reportedly, the output of these industries will be even lower in 1950 because a blight is destroying the sugar beet crop. This disease is particularly virulent in the Banat.
2. Because of a lack of the necessary sprays it is impossible to combat this disease.
